Dear Members,

Please find below some guidelines to help you receive full benefits from your Empire Trade membership.

Consider Your Trade Percentage

Think about the trade percentage you would like to accept. Empire Trade offers its members total flexibility when accepting trade: You may change your percentage from job to job, or at different times of the year, however you must respect the right of other members to have the same flexibility. Please note however that members who offer a very low trade percentage statistically will not receive as much extra business as a member offering a higher trade percentage. The idea is not only to offer your profit margin as the trade component, but also to cut into the cost of producing your sale to help generate the extra business, making sure that you are spending your trade dollars wisely by using them on cash expenses you already incur.

If you choose to join either the 50% Plus Club or the Gold Club you must trade at the required percentages with all other Club Members. By joining these Clubs you can reduce your monthly administration fee.

Right Price, Trade Component Negotiable

"Right Price, Trade Component Negotiable" is our motto. Simply, this means we don't enforce a standard trade percentage across the board as other trade exchanges do, however we expect your price to remain comparable with prices on the cash market. You decide what trade percentage to offer.
